IT professional with experience in SAP SuccessFactors application management and hands-on experience with Linux, self-hosting, homelab infrastructure, web development, and troubleshooting. Comfortable with system administration fundamentals, scripting, containerized services, and security principles. Seeking a junior IT, systems administration, or cybersecurity engineering role where I can grow through practical infrastructure and security work.

Education

Gymnázium Brno Vídeňská — maturita exam
všeobecné gymnázium

Masaryk University Faculty Of Informatics

Completed one semester before transitioning into full-time work

Experience

Proveon
Call center operator

KBC Global Services
User management officer — 05/22 - 08/25
Incident management in ServiceNow

User management in SAP HCM and SF

KBC Global Services
Application Manager — 08/25 - present
Compensation, LMS, EC, Recruiting module ownership

Daily log tracking in integrations between SAP HCM and SAP SF

Coordination with business and change request implementation

Work projects

KBC Career page
I collaborated with Communications Team to help develop a visually appealing, user-friendly and responsive career page for KBC.

Career site penetration test
Based on internal security findings, I coordinated penetration test with business and SAP security team and based on SAP recommendations we remediated the potential vulnerabilities.

Personal/freelance projects

Rental vine celllar web presentation
https://sklepzavinohradem.cz

Self-hosting
Linux-based homelab with self-hosted services using docker.

Reverse proxy, DNS, TLS, remote access, and service monitoring.

Patching, host hardening, and troubleshooting of system/network issues.

Secure access via wireguard meshnet and DNS filtering using PiHole
